Software Engineer

Motivated Computer Science undergraduate with a strong foundation in Full Stack Development and Data Structures & Algorithms. A naturally curious and analytical thinker who enjoys deeply analyzing problems to build efficient solutions. Seeking an entry-level Software Developer role to apply problem-solving, backend development, and system-thinking skills to real-world projects.

PROJECTS

Deep Packet Inspection Engine (C++ Project)

- Developed a high-performance Deep Packet Inspection engine in C++17 to analyze network traffic from PCAP files and identify application-level communication.
- Implemented packet parsing for Ethernet, IP, TCP/UDP layers and extracted TLS SNI domains for traffic classification.
- Built configurable traffic filtering to block specific applications, domains, and IP addresses through command-line policies.
- Designed a multi-threaded packet processing architecture using POSIX threads to improve throughput and scalability.

Gen-AI Resume Builder & Job Matcher

- Built a full-stack web application that generates professional resumes using AI and evaluates resume-job skill compatibility.
- Integrated OpenAI API to automatically generate resume content and provide improvement suggestions. • Implemented a job-matching algorithm that analyzes job descriptions and calculates skill match percentage.
- Developed REST APIs with Node.js and MongoDB and created a responsive frontend dashboard for resume creation and analysis.

Data Structures & Algorithms

- Solved 150+ Data Structures & Algorithms problems across key topics such as arrays, strings, linked lists, stacks, queues, and trees.
- Strong grasp of time and space complexity analysis for writing optimized and efficient algorithms.
- Actively practicing competitive programming in C++, improving logical reasoning and algorithmic problem-solving skills.

SKILLS

Languages: C/ C++ ,
JavaScript, Python(basics)

Frameworks: Angular,
Bootstrap, Tailwind CSS,
Express.js, Node.js,
React.js(learning)

Database: MongoDB, SQL/
MySQL

Coursework: Data Structures
& Algorithms, DBMS, OOPs,
Operating Systems, Software
Engineering, CN

Concepts: RESTful APIs,
Authentication (JWT)

Tools: Git, GitHub, VS Code,
Postman, npm

Areas of Interest: Backend
Engineering, Full-Stack Web
Development

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science & Engineering

DAV Institute of
Engineering & Technology
Jalandhar

GPA: 8.2

08/2023 - 08/2027
